### **Factor VII testing in the Deerhound £33 including VAT**

**Animal DNA Diagnostics Ltd** is now routinely offering testing for Factor VII in the Deerhound. We have now provided testing for a number of Deerhound breeders and are confident that they have been pleased with our service.

Please visit our website to submit an order. On the HomePage please click on "I require a DNA test for a dog", and the web-shop will lead you through the ordering stages. You can enter all of the required information online – this avoids the need for hand-written forms which can sometimes be difficult to read and lead to errors. You will receive a mouth swab kit by return of post with instructions and a return envelope. Tests will be performed quickly and you will receive your results by email as soon as they are ready; a certificate will follow in the post.

There are reduced prices for batches of 10 or more samples submitted together, and we can also provide bundles of swab kits for breed shows.

In addition to disease testing we provide DNA profiling and parentage verification.

Details of our terms and conditions, and information about our services can be found at <https://www.animaldnadiagnostics.co.uk/page/terms> and [https://www.animaldnadiagnostics.co.uk/page/ordering\\_info](https://www.animaldnadiagnostics.co.uk/page/ordering_info). Please also "like" our facebook page to keep up-to-date with our offers.

If there is any further information that you would like please ask!
